Aeries Technology (AERT) Launches AeriesOne to Accelerate Generative-AI Transformation for Mid-Market Private-Equity Portfolio Companies

August 4, 2025

Modular "AI Value-Creation Engine" pairs LLM-powered agents with digital-twin GCC frameworks to cut AI rollout cycles and unlock operational leverage.

New York, New York--(Newsfile Corp. - August 4, 2025) - Aeries Technology, Inc. (NASDAQ: AERT), a global leader in AI-powered business transformation and Global Capability Center (GCC) services, today introduced AeriesOne, an integrated generative-AI value-creation platform designed to help mid-market private-equity (PE) portfolio companies move from AI pilots to production-scale impact.

AeriesOne equips PE-backed enterprises with modular, data-driven building blocks that optimize operations and accelerate AI adoption across Engineering, Customer Support, IT, and Finance. The platform combines in-house accelerators with trusted partner components so clients can progress from experimentation to measurable results without disrupting day-to-day business.

Bain & Company projects the global market for AI products and services could reach between $780 billion and $990 billion by 2027, underscoring the scale of value-creation opportunity for mid-market PE portfolios (Bain & Company, 2024 "State of AI" report). Further, McKinsey estimates generative-AI applications could unlock $2.6 trillion to $4.4 trillion in annual economic value (McKinsey Global Institute, 2023).

Leveraging this increase in AI adoption within its mid-market PE focus, Aeries estimates a potential 25+% increase in its Total Addressable Market with a higher margin mix, based on its strategic positioning and execution.

"While many mid-market firms are exploring AI, only a fraction have moved beyond pilots," said Ajay Khare, CEO of Aeries Technology. "AeriesOne is designed to bridge this adoption gap-offering a practical path from ideation to implementation, with minimal disruption and faster time-to-value."

Three Foundational Pillars

- A1 GCC - Digital-twin operating-model templates, real-time dashboards, and governance analytics spanning talent, operations, and compliance.
- A1 Marketplace - A curated catalog of LLM-powered agents, automation modules, and vetted third-party APIs for insight generation and process acceleration.
- A1 Support - Shared services covering HR, Talent Acquisition, IT, Finance, Procurement, and Legal to keep GCC operations production-grade and compliant.

"The power of AeriesOne lies in its flexible design and pragmatism," said Unni Nambiar, CTO of Aeries Technology. "We're not offering a one-size-fits-all solution. Instead, we're enabling our clients to assemble, adapt, and scale the right AI-powered capabilities at the right pace, backed by our domain expertise and GCC delivery model."

Key Benefits

- Accelerated Adoption - Pre-configured templates and reusable components reduce proof-of-concept-to-production timelines.
- Modular Flexibility - Phased deployment architecture evolves with client needs and future-proof integrations.
- Governance & Compliance - PE-ready transparency, auditability, and operational control baked into every module.
  - Partner-Powered Innovation - Continuous pipeline of new generative-AI tools through Aeries' Partner Network and internal R&D.

By productizing its AI accelerators, Aeries anticipates expanding wallet share across its current GCC client base while opening new mid-market PE pipelines.

With AeriesOne, Aeries Technology reinforces its commitment to unlocking long-term value for PE-backed mid-market firms, bringing practical AI transformation through guided frameworks, trusted components, and results-oriented partnerships.

About Aeries Technology

Aeries Technology (NASDAQ: AERT) is a global leader in AI-enabled value creation, business transformation, and Global Capability Center (GCC) delivery for private-equity (PE) portfolio companies, supporting scalable, technology-driven execution. Founded in 2012, its commitment to workforce development has earned it the Great Place to Work Certification for two consecutive years.
